Witness observed 20 miles NE of Baltimore six F15 aircraft flying at a high altitude laying down heavy vapor trails and as they passed out of sight to the south he observed a small object coming from the north moving at a high rate of speed. It caught up with the vapor trails and passed through them and then maneuvered around and started moving parallel with the vapor trails and came within a short distance of the F15s and made a sweeping turn at which time it reflected the sun and proceeded back to the north and out of sight. Witness is a 66 year old retired pilot. Observed the object for twenty seconds. The object did not leave a trail and at one point it came to a complete stop while traveling at a high rate of speed and then started moving again instantly.

An unidentified object seen last week in this rural town along the Tennessee-Kenutcky border was really a U.S. Army helicopter from Fort Campbell, KY, U.S. Rep. Bart Gordon said Wednesday.

Congressman Gordon, called the U.S. Army and Air Force to investigate the UFO matter and he found out that it was a helicopter, said Meg McKnight, a spokeswoman for the Tennessee Democrat.

Residents in Celina reported seeing the craft on July 8, through july 10, after an intial sighting by 200 people at a softball game, sais Clay County Sheriff's dispatcher Lisa Gail Boles.

Witnesses said: the object was 250 to 300 feet long, with an octagonal shape, at least four outside lights and a beacon at the center.

However - Capt. Randy Pullen at Fort Campbell said: the crafts are about 30 feet long. Major Mike Dormeyer at the Fort Campbell Army Base confirmed that three UH-60 Blackhawk helicopters were flying on all the nights the sightings were reported, Ms. McKnight said.

Dormeyer said: the crafts were not easily identified because they are equipped with turbine engines that cover up the sound of the blades, Ms. McKnight said.

The Clay County Sheriff's Department has classified the object as a plane.

However, Ms. Boles said: "It wasn't a helicopter, I seen it myself," she said:" It was a two-engine plane that followed the same route for three nights."

Bob Manil observed what looked at first like a meteor or shooting star but went at different speeds and would go zigzag. Sometimes it would come a little closer and get a little brighter but never close enough to let him see the shape only that it looked like a star. He observed it for five minutes as it headed north. One other witness also observed the light for about 30 seconds. Sometimes the light would come to a complete stop and then continue.
